How To Draw A Fox Portrait

Grab a piece of paper, and select 2 colour pencils: 1 light colour and 1 darker colour for the outline.

Step 1.
With a light colour pencil, draw a circle. Then draw an oval with pointed tips at the base of the circle.

Step 2.
Place 2 circles side by side for eyes.

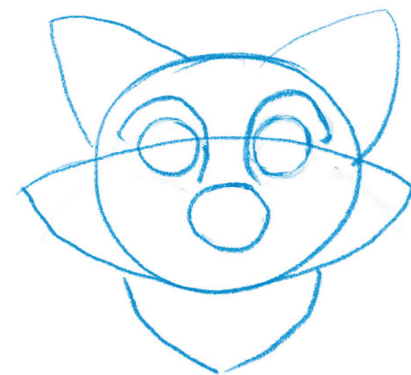

Step 3.
Place 1 circle below the eyes, for the snout.

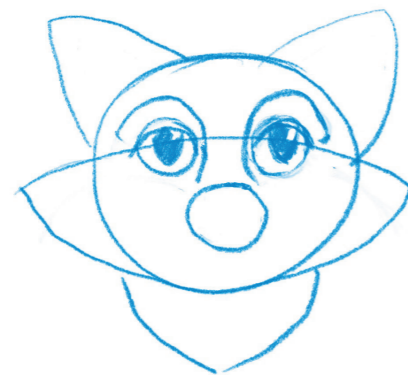

Step 4.
For each eye, draw an arc from the outer corner of the eye, down to join the snout.

Step 5.
Draw 2 triangles on either side of the head for ears.

Step 6.
Draw 2 arcs coming down to a point, underneath the head for his neck.

Step 7.
Add circles inside the eyes for pupils, and reflections.

Step 8.
Add a triangle at inside the top of the snout. Draw a line down from the nose, and make 2 small arcs at the end for the mouth.

Step 9.
Draw in 2 arcs from the edge of the oval, in towards the snout.

Step 10.
With a darker pencil, outline the main lines of your portrait, and add more details if you wish.
